

Quiz today

PENCIL

You also need your spiral/comp notebook (or separate sheet of paper).

Nov 2-11:53 AM

(t) $-5x + 7 = 27$

-7

$-5x = 20$

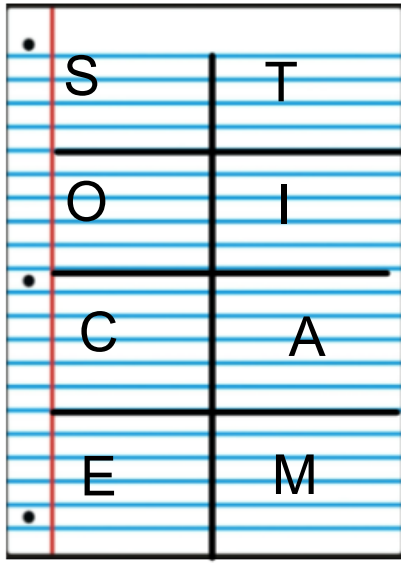

$x = -4$

(D) $-10x = 81$

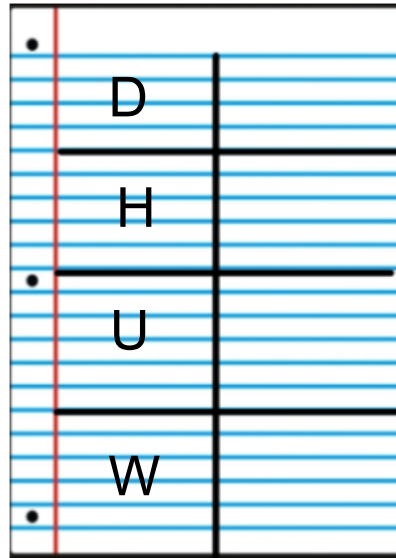

$x = -8.1$

Nov 2-11:54 AM

When you are finished, stay at your seat and place your quiz under (not in) the folder. You will need to work on worksheet E-76. Work must be shown on a separate sheet of paper set up in boxes as Mrs. Smith instructs you. You are to work out columns 1 and 2, not 3 (12 problems).

You must rewrite each problem and solve algebraically. This is HOMEWORK if not completed in class.

Nov 1-1:35 PM
